

When is “Too Dangerous” Too Dangerous – on-line

Mark Benvenuto: benvenma@udmercy.edu

You Tube basically has all of this. Go to:

Sodium metal.

<http://www.youtube.com/watch?v=LM-93gBZvio>

Sodium metal + water + idiots = big explosion + ringing ears

<http://www.youtube.com/watch?v=bS3TEVXjSGQ&NR=1>

Molten metal. – lead dripping from a wood stove.

<http://www.youtube.com/watch?v=6uYn-rza63Q>

Chlorine production. – contained in a glass round bottomed flask

<http://www.youtube.com/watch?v=4OVIp93eWJY>

Thermite. – blowing up a car with it:

<http://www.youtube.com/watch?v=1bvPdgS2Pjg> .

Touch powder. - by searching for nitrogen triiodide:

a feather detonating it on a piece of filter paper

<http://www.youtube.com/watch?v=2K1Af936E90>

Students walking on it http://www.youtube.com/watch?v=U_5M6dfaCCY
